PURPOSE

Our primary Health and Safety Objective at NRG Industrial is No Injury or Illness.

APPLICATION

NRG Industrial is committed to providing healthy and safe working conditions for the prevention of work related injury and ill health for all people associated with our business, including employees, contractors, visitors and members of the public.

SCOPE

NRG aims to achieve this through the development and implementation of our Health and Safety Management System. The system is based on the requirements of ISO 45001 and is a systematic, risk based approach to managing workplace health and safety.

This approach includes:

- Setting health and safety objectives and targets and plans to achieve them
- Complying with relevant legislation, industry standards and codes of practice
- Provision of resources and support including a safe working environment, plant and equipment, and safe systems of work.
- Ensuring hazards and risks are identified, assessed and eliminated to the greatest extent possible
- Consultation with employees and subcontractors on health and safety decisions and inclusivity on communication of health and safety information
- Provision of health and safety training to employees and subcontractors
- Ensuring all managers, supervisors, workers and subcontractors are aware of and accept their health and safety obligations
- Monitoring health and safety performance
- Continual improvement of our Health and Safety management system

This policy is communicated to our employees via the Company Induction and is displayed at NRG Industrial offices and on our website.

The Health and Safety Management System and supporting Policies are endorsed by the Director of NRG Industrial and reviewed at regular intervals to ensure relevance is maintained in line with legislative changes, technological advances and as our organisation evolves.

Maverick Dale

Managing Director
